

Lubricant and Mineral Oil ABC

UNITI-MINERALÖLTECHNOLOGIE GMBH

The well-known and popular standard reference book “Lubricant and Mineral Oil ABC” has been published in 2017 and is an ideal reference book for those involved in the lubricant and mineral oil sectors.

It explains 830 terms for the associated product groups of fuels, lubricants and heating fuels, and due to the increased importance of HSE legislation also for the areas of chemicals legislation, environmental law, occupational health and safety and dangerous goods legislation. Numerous references to corresponding DIN/EN/ISO standards as well as references to other terms make it easy to find further information on specific topics.

Furthermore, abbreviations relevant to the industry at the end of the book are very useful. An overview table with relevant test methods for the lubricant and mineral oil sector shows the corresponding ISO standards as well as cross-references to different national standards.

➔ **Order form and prices on the back side**

In order to take account of globalisation, the reference book is published in German and English. In the English version, the corresponding German designation is given for each listed English term. Authors of the reference book are Edwin Leber, Dr. Bernd Lindstaedt and Dr. Ralf Michael.

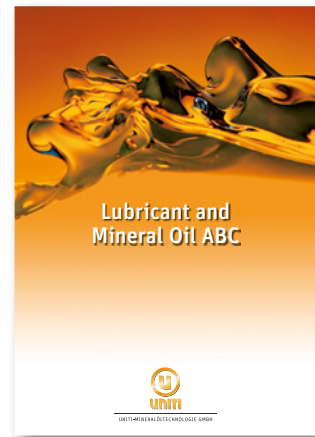

The “Lubricant and Mineral Oil ABC” of UNITI is a valuable guide for the daily work. It appears in handy DIN A5 format and is also an ideal promotional gift; especially because an individual corporate text and logo can be printed on the title cover in the lower third, and moreover it is also possible to use the cover (title and back cover) for a complete company-individual design.

Information on the German version “Schmierstoff und Mineralöl ABC” see UNITI Weblink:
